

MJ-M/FJ-M

Molded Race,
Self-Lubricating, Metric

Rod Ends Industrial/ Commercial

Suitable for many light and heavy/medium industrial/mechanical motion transfer applications requiring metric thread sizing, the TGA Cables MJ-M/FJ-M Series offers an injection-molded, reinforced nylon raceway design. It delivers low maintenance, self-lubricating characteristics, as well as moisture-resistance properties, adding to its overall versatility. Ball and body materials are produced from an economical low carbon steel and the ball is nickel plated for improved corrosion resistance (ball is also case hardened for extended wear). The body is clear dichromate treated for extended corrosion resistance. Suited for applications requiring low friction, low moisture absorption, high wear resistance and/or wide operating temperature ranges. Studded and right or left-handed thread versions are available.

The MJ-M/FJ-M Series is just one of many within our broad line of industrial/commercial rod ends. For full product line detail, contact us for a comprehensive catalog or visit tgacables.com.au and download individual product data sheets and other product information.

Description:

MJ-M/FJ-M
Industrial/Commercial Rod Ends
Molded Race, Self-Lubricating,
Metric

Applications:

Numerous mechanical motion transfer devices/applications, including:

- Construction equipment
- Recreational vehicles (ATV's, golf carts, etc.)
- Truck/off highway

Features:

- Nylon molded raceway delivers self-lubricating low friction and moisture-resistant performance
- Good wear resistance
- Design allows for control of breakaway torque, adding to its application versatility
- Can be used in a wide range of temperatures: -30°F — 220°F (-34°C — 104°C)
- Offered in studded and right or left-handed versions
- Special custom alloy construction available
- Custom assemblies can be built to your specifications
